The Peach Blossom Spring: the text, a modern reading, and five layers of space

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

The received text

What follows is the received Peach Blossom Spring (桃花源记). The tale is set in the Taiyuan reign of the Eastern Jin. Tao Yuanming (陶渊明) wrote it; later readers place the piece around the year 421. It is literature. The village inside it does not have, and should not be given, a GPS point.

> 晋太元中，武陵人捕鱼为业。缘溪行，忘路之远近。忽逢桃花林，夹岸数百步，中无杂树，芳草鲜美，落英缤纷。渔人甚异之，复前行，欲穷其林。
>
> 林尽水源，便得一山。山有小口，仿佛若有光。便舍船，从口入。初极狭，才通人。复行数十步，豁然开朗。土地平旷，屋舍俨然，有良田、美池、桑竹之属。阡陌交通，鸡犬相闻。其中往来种作，男女衣着，悉如外人。黄发垂髫，并怡然自乐。
>
> 见渔人，乃大惊，问所从来。具答之。便要还家，设酒杀鸡作食。村中闻有此人，咸来问讯。自云先世避秦时乱，率妻子邑人来此绝境，不复出焉，遂与外人间隔。问今是何世，乃不知有汉，无论魏晋。此人一一为具言所闻，皆叹惋。余人各复延至其家，皆出酒食。停数日，辞去。此中人语云：“不足为外人道也。”
>
> 既出，得其船，便扶向路，处处志之。及郡下，诣太守，说如此。太守即遣人随其往，寻向所志，遂迷，不复得路。

> 南阳刘子骥，高尚士也，闻之，欣然规往。未果，寻病终。后遂无问津者。

A geographic note

The fisherman is a man of Wuling (武陵). Today's Taoyuan County (桃源县) lies in Changde (常德), and the old commandery name still hangs over that country. Taohuayuan Ancient Town and the scenic area are later places built so that a reader can walk beside the essay. The site stores a point for the town. That point is the town, not the mouth of the fisherman's cave. The Qin cave, the stream's source, and the prefect's office have no separate coordinates. Where the data is silent, this book does not draw a pin.

A modern Chinese reading

In the Taiyuan years a man of Wuling fished for a living. He followed a stream and forgot how far he had come, until a peach wood closed over both banks for several hundred paces, with no other tree among them, the grass fresh and the petals falling. He went on to see the end of it. Where the wood and the water ended, a hill stood, and a small mouth in the hill seemed to hold a light. He left the boat and entered. At first the passage was only wide enough for one body. After some dozens of paces it opened: flat land, ordered houses, good fields, pools, mulberry and bamboo. Paths crossed. Dogs and chickens answered each other. The people at work wore clothes unlike those outside. The old and the children looked at ease.

They were startled, asked where he had come from, and took him home to wine and chicken. The whole village came to hear. They said their forebears had fled the troubles of Qin with their families and neighbours, had reached this cut-off place, and had never gone out again, so that news of the world had stopped. They asked what dynasty it was, and they did not know of Han, still less of Wei or Jin. He told them what he had heard. They sighed. House after house fed him. After several days he left. They said there was no need to speak of this to people outside.

He found the boat, followed the way he had come, and left marks. At the commandery he told the prefect. The prefect sent men after the marks. They lost the way and never found it again. Liu Ziji of Nanyang, a man with a name for high-mindedness, was glad and planned to go. He never did. He fell ill and died. After that, no one asked after the ford.

A literary English

The English above is written for this roadbook. It is not a copy of an existing transla - tion. The classical Chinese on the previous pages is the text to trust.

Five layers of space

Read the piece as a sequence of spaces rather than as a dynasty. Each layer is a space in the essay, not a ticket zone in the park.

Five layers in the Peach Blossom Spring

Layer	In the essay	What in Taoyuan may stand beside it
1 · Stream	He followed the stream and forgot the distance.	Qinxi is a later waterway. It is not the stream whose distance the fisherman forgot.
2 · Wood	A peach wood, several hundred paces, no other tree.	The peach forest at Taoxian Ridge is a blossom place. The route page points to March and April. Look again when you are there.
3 · Mouth	A small opening, as if there were a light.	The data has no coordinate for this mouth. Do not promote a show cave into it.
4 · Open land	Flat land, ordered houses, fields and pools.	Qingu is a later scene set out for the essay. It helps a reader. It is not a dig.
5 · Lost road	They followed the marks and never found the way.	This is the ending of the piece, not a closed modern road. Not finding it is the point of the prose.

What “a world apart” means here

Qinxi and Qingu (秦溪、秦谷), a site schematic. Confirm the landing and the path on the route page. The data has no separate coordinate for this picture.

The four characters 世外桃源 walked out of this essay and became a set phrase for a life apart from noise. The phrase flatters. Tao was not describing a resort you can book, or a political programme. The villagers had fled the wars at the end of Qin, and they did not know Han, Wei, or Jin. Once the fisherman left, the road failed. The force of the piece is that the road cannot be found again.

Northwest Hunan is not one word, “karst.” Around Wulingyuan the route pages speak of peak forest, streams, and high sandstone: Jinbian Stream, Yuanjiajie, Tianzi Mountain. On the Taoyuan side the library is the Yuan River, islands, tea hills, and low switchbacks: Yiwangxi, Bailinzhou, Cha'anpu, Tieryan. Fenghuang, Dehang, and Aizhai put an old town, a Miao village, and a gorge on the west. This book does not invent a geological era or a summit height. If elevation is absent, the drawing says so.

Beside Utopia and Shangri-La

Three books are often stacked as if they were the same dream of a perfect country. They are not. The table compares books and names. It does not compare tickets, and it does not send this volume to the city in Yunnan that later took the name Shangri-La.

Three books, three elsewheres

	Peach Blossom Spring	Utopia	Shangri-La
Author and year	Tao Yuanming, the essay around 421	Thomas More, 1516	James Hilton, Lost Horizon, 1933
What it is	A prose record. The village lives in the sentences.	A Latin political fiction. The island is invented.	An English novel. The valley is invented.
A later place-name	Taoyuan County and the ancient town use the name. You go to a real place in Changde.	There is no city you should check into by the novel's coordinates.	Places later borrowed the English name. This volume does not route there.
How to use it	Use it to read water, wood, and the lost road. Do not use it as proof of a cave mouth.	Use it as history of an idea, not as a roadbook.	Use it as reading, not as this volume's destination.

The golden triangle

The three towns of this volume are Taohuayuan Ancient Town, Dayong Ancient Town, and Fenghuang Ancient Town. The stored points sit near 28.78 N, 111.42 E for Taohuayuan; 29.12 N, 110.48 E for Dayong; and 28.02 N, 109.60 E for Fenghuang. The appendix prints the decimals and the source. The triangle tightens westward: Taoyuan to the east, Dayong to the north, Fenghuang to the southwest. Tianmen Mountain, Wulingyuan, and Furong Town are stops inside the triangle, not a fourth old town.

Do not plan a day by the straight line. Taoyuan to Dayong, and Dayong to Fenghuang, are mountain roads and intercity seats, not the hypotenuse. Use the route pages. The site's traffic note puts Zhangjiajie West station about 191 kilometres and about two hours and fifteen minutes from Taohuayuan, and it does not treat that station as the preferred first landing. The figure is the site's. Read the road on the day.

Visas: only the three categories the site already separates

This chapter is time-sensitive. It is not a statute. Nationality, length of stay, ports, and city boundaries change. This book does not print a 30-day country list, a roster of the roughly 29 mutual-waiver partners, or a 240-hour transit list. Open https://www. - taocross.world/?tool=visa and check your passport again. What follows only restates the categories the site already separates.

Unilateral waiver

The site places some passports in a unilateral visa-free category and then checks whether the planned stay still fits. That category is not trimmed by the 240-hour city boundary. Whether your passport is in it, and whether your days fit, is the tool's answer and the immigration authority's notice. This book does not answer for the tool.

Mutual waiver

Mutual waiver is a separate bilateral list. The site's line is “about 29 partners.” Length of stay follows the treaty. This book keeps that sentence and does not unfold it into a roster. Before you buy the ticket, read the foreign ministry's current list and run the site's tool again.

Transit visa-free: Changsha Huanghua and Zhangjiajie Hehua

For transit, the site requires a confirmed onward ticket to a third country or region, counts the stay from 00:00 on the day after entry, and keeps you inside the open cities and counties. The ports it names include Changsha Huanghua (CSX) and Zhangjiajie Hehua (DYG). Changde is not a first port of entry. The site says Changde Taohuayuan Airport has no regular international service. The international sector lands in Beijing, Shanghai, Guangzhou, Changsha, or Zhangjiajie. Changde is a domestic continuation. A flight straight home to the country you came from does not match the site's account of transit.

Rail and lodging for travellers from Hong Kong, Macao, and Taiwan

The site's pre-trip notes say: carry the original document into a 12306 station; a li - censed hotel usually files a passport for you; a remote guesthouse may not be online, so complete the foreign-guest registration within 24 hours. Travellers from Hong Kong, Macao, and Taiwan in practice use a Home Return Permit, a Taiwan Compatriot

Permit, or whatever document is current. This book will not choose that document for you. Document type, endorsements, and any waiver are for the authority and for the site's tool. China does not accept an International Driving Permit. If you mean to drive, ask locally about a temporary permit. Otherwise take the train and a local driver.

TaoCross 书网联动信息框

Visa tool
https://www.taocross.world/?tool=visa

How to reach Taoyuan, Dayong, and Fenghuang

Timetables and fares belong to 12306, the airport, and the shuttle on the day. The sentences below are ones the site's traffic notes already print.

Where to land

For Taohuayuan, the site names Taoyuan station, Changde station, and Changde Taohuayuan Airport. It describes the Changde airport as domestic, not a first port of entry. International travellers clear immigration at Changsha Huanghua, Zhangjiajie Hehua, or at Beijing, Shanghai, or Guangzhou as the site names them, then continue on a domestic sector.

Changde and Taoyuan

The site says the fastest high-speed train from Changsha to Changde is 59 minutes. It describes a free shuttle, fare ¥0, between Shending Gate on Changde's river street and the Wuliu visitor centre, calling at Changde station and Taohuayuan Airport, about an hour, two round trips a day. Taoyuan station to the ancient town is 33 kilometres, ¥10, both ways from 9:00 to 17:00, 24 runs, last bus 17:00, about 40 minutes. For an evening show the site says to sleep in the scenic area or the town, because that last Taoyuan bus is 17:00. If the shuttle changes, the station notice wins.

Zhangjiajie West

The site puts Zhangjiajie West about 191 kilometres and about two hours fifteen minutes by road from Taohuayuan, and it no longer treats that station as the preferred first stop. The Dayong and Tianmen flagship routes start in Zhangjiajie city. Buses from the city to the cableway and to Wulingyuan belong to the transport sections of XXB80-R61 and XXB80-R63. This book does not publish a second timetable.

Fenghuang and the west

The classic two days in Fenghuang are marked as walking. Qiliang Cave, the Southern Great Wall, Dehang, and Aizhai are bus plus a local hop, and the pages give approximate driving times. Those minutes die when the road changes. The seven-day loop THY-DY-F05 says a hire car is easy to return because you leave Dayong and come back to Dayong. Read the licence sentence in the previous chapter before you hire.

A digital kit and three passes

The site's notes suggest a roaming eSIM that works in China, Amap with its interface language switched, and the route-page crossing map saved as SVG so the stop order is still readable with no signal. 12306 has a foreign-language interface. Carry the original document into the station. Map software refreshes its information on the network. The offline SVG is the preset backup when there is no signal. These are tools. This book does not sell them.

How much of a route page is open

The 794 spot cards are free. Each route opens about a fifth by default: the overview, the links onward, the node list, and the topology. All nine sections, the pictures, the quick cards, and the Markdown, PDF, and SVG exports wait until that route id is on your unlocked list. A membership tier by itself does not unlock a route.

Three prices

Three prices only. ¥6.9 unlocks one route you choose, forever. It does not grant 50 credits and it is not 50 routes. ¥52 is the seven-day pass: seven days, 50 credits. ¥68 a month adds 100 credits that accumulate and do not reset. Credits can be spent only before the quota window ends. Opening a route you have already unlocked does not spend another credit. Read the checkout before you pay. This book does not add a fourth price.

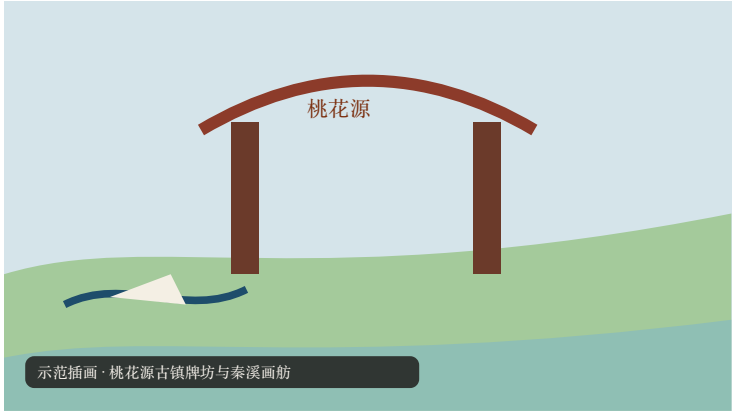

US-dollar checkout uses Paddle. Renminbi uses the channels the site has switched on. Card numbers and CVVs do not belong in this roadbook, or in a screenshot of it. An agent may spend a credit only with your explicit consent.

TaoCross 书网联动信息框

TaoStudio

https://www.taocross.world/studio

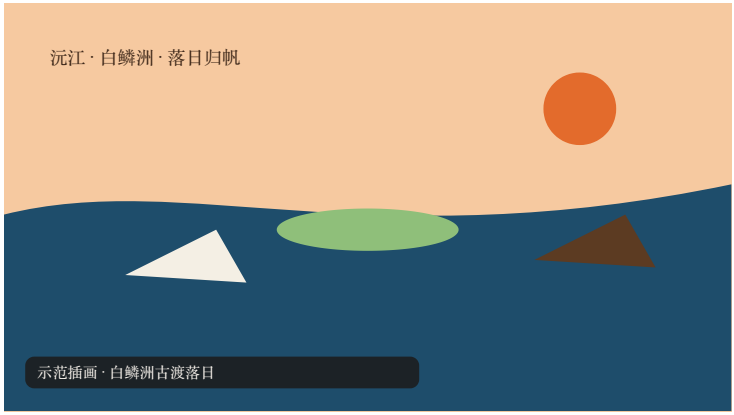

The Taoyuan plate

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

Qinxi and Qingu (秦溪、秦谷), a site schematic. Confirm the landing and the path on the route page. The data has no separate coordinate for this picture.

Bailinzhou ferry (白鳞洲), a site schematic. Coordinates 28.79120° N, 111.41114° E (THY stop_geo WGS-84 (TY-1DAY-01))

Taoyuan uses the ancient town as home port. The first flagship routes leave from it and come back: XXB80-R01 for the essay's fields, XXB80-R02 for Yiwangxi, XXB80-R03 for Bailinzhou in flower, XXB80-R04 for Cha'anpu. The town, the scenic area, Taochuan palace, Bailinzhou, the Cha'anpu tea hills, Yiwangxi, Tieryan, Xuehua Cave, and Tangjiaxi have stored points. Wuliu Lake, Qinxi, Shuifu Pavilion, Yanwuxi, and Yifengjian do not.

The workshop on the high street is Dongxian Yijing Leicha (洞仙逸景擂茶). The GI brand is Taoyuan Leicha (桃源擂茶). The plate map does not promote the workshop into a new spot id. Tea growing belongs to Cha'anpu in the west. Pounded tea belongs to hospitality in the town. Both are in this county. They are not the same hillside.

The days and the two-day routes below use real ids from the catalogue. Each QR target was checked against the router. None of them is a 404.

The Dayong plate

Dayong is the older name of Zhangjiajie city. The C-series flagships start here: XXB80-R61 Tianmen Mountain, XXB80-R62 Dayong town and the Seventy-Two Towers, XXB80-R63 Wulingyuan. Dayong, the city, Wulingyuan, and Tianmen Mountain have coordinates. The towers, the prefecture town, the Tujia garden, Jinbian Stream, Yuanjiajie, Tianzi Mountain, and the glass walk do not.

Regional notes ZJJ-R02, ZJJ-R03, and ZJJ-R05 are more specific than the flagships, and they have no pages of their own. This book uses their itinerary sentences and points every QR code at the flagship they already link, so a scan does not land on an empty address.

Wulingyuan's peaks are not Taoyuan's tea hills. Putting two days of Wulingyuan and a half day of Dayong town on the same date makes sense only if you are already sleeping in the city and the flagship transport section allows it. Otherwise keep DY-D01, DY-D02, and DY-D03 apart.

Fenghuang and the western Hunan plate

Fenghuang Ancient Town has a stored point. So does Nanhua Mountain. The Tuo River, the stepping stones, Shen Congwen's house, Hongqiao, Qiliang Cave, the Southern Great Wall, Shanjiang, Aizhai Bridge, and Tianwen Terrace do not. Dehang, Furong Town, and Qianzhou have WGS-84 pairs on the seven-day route's stop_geo.

The B-series flagships make Fenghuang a walking town, then send the cave, the wall, the village, and the bridge out by road on a second day. XIANGXI-R01 is a longer re - gional note, from Aizhai and Dehang at Jishou through Fenghuang, Chadong, Shibadong, Baojing, Guzhang, Furong and Laosicheng in Yongshun, and on to Liye in Longshan. It has no page. The three-day and seven-day routes in this volume do not pretend to walk that whole ring. Chadong, Shibadong, Liye, and Laosicheng stay as names in the appendix when they have no coordinate.

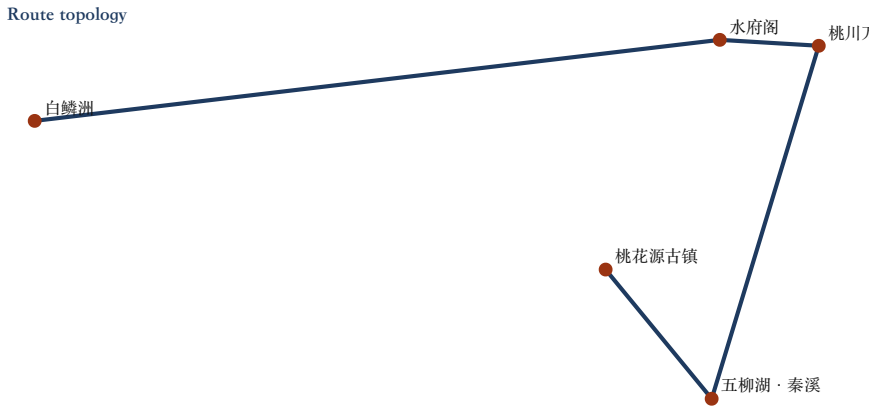

Foods named on the pages, without prices: blood-cake duck, sour-fish soup, and ginger candy in Fenghuang; Miao bacon in Dehang; rice tofu, bacon, and artemisia cakes in Furong. Order with the card in chapter 18. Pounded tea uses the GI name Taoyuan Leicha. Do not invent another shop name.

Three Taoyuan days: TY-D01, TY-D02, TY-D03

The three codes are editorial. Each section opens with that route's topology and ele - vation profile, then the book-and-site box. On TY-D02 the workshop name remains Dongxian Yijing Leicha (洞仙逸景擂茶).

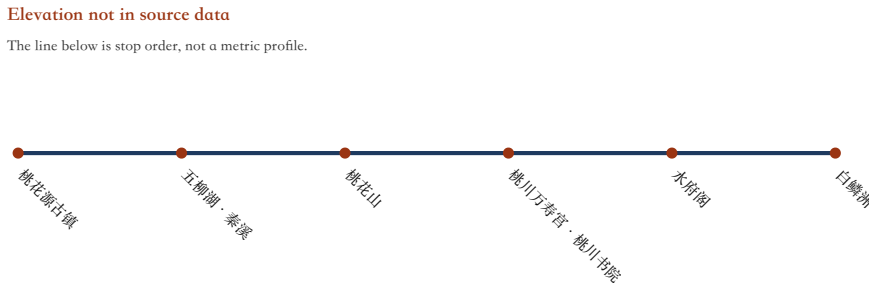

TY-D01 · Taoyuan day · the town, Qinxi, and Peach Blossom Mountain

Destination route TY-1DAY-01. The book code TY-D01 is the editorial name. The live page is the slug above.

No stored coordinate, order only: 桃花山

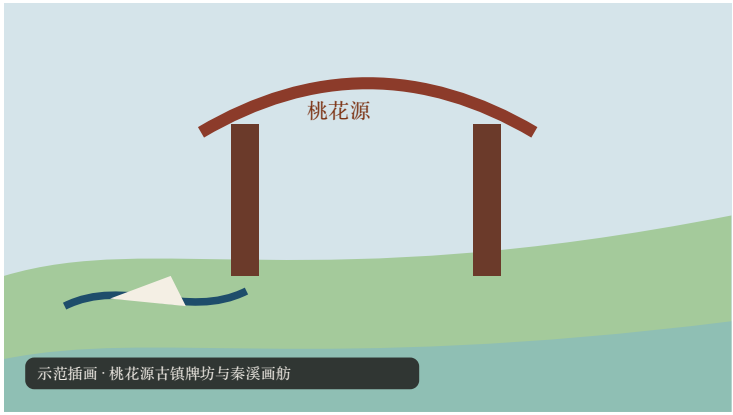

High-contrast print topology.

Elevation was not in the source.

Stops with stored coordinates: 桃花源古镇 28.77430° N, 111.42608° E · 五柳湖 · 秦溪 28.75962° N, 111.42886° E · 桃川万寿宫 · 桃川书院 28.79974° N, 111.43166° E · 水府阁 28.80041° N,

111.42907° E · 白鳞洲 28.79120° N, 111.41114° E

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

Qinxi and Qingu (秦溪、秦谷), a site schematic. Confirm the landing and the path on the route page. The data has no separate coordinate for this picture.

Walk the nodes stored on TY-1DAY-01: Taohuayuan Ancient Town (桃花源古镇), Wuliu Lake and Qinxi (五柳湖 · 秦溪), Peach Blossom Mountain (桃花山), Taochuan Wanshou Palace and Academy (桃川万寿宫 · 桃川书院), Shuifu Pavilion (水府阁), and Bailinzhou (白鳞洲). The file treats the ancient town as the base. Boat landings and the scenic-area bus change; read that page on the day.

The neighbouring flagship, XXB80-R01, writes an 8:30 opening and an evening Peach Blossom Spring show at about ¥298 a person. Those figures are quoted from that route page, not set by this book. Coordinates are printed only where the data has them. Shuifu Pavilion, Wuliu Lake, and Qinxi have no separate point, so the map keeps their order without inventing a pin. Elevation is not in the source, and the profile says so.

TY-D02 · Taoyuan day · the high street and Dongxian Yijing Leicha

TY-D02 is an editorial day. The page that opens is flagship XXB80-R01, a two-day town route. This chapter keeps the town and the workshop; the second day stays on that page.

Route topology

No stored coordinate, order only: 洞仙逸景擂茶

High-contrast print topology.

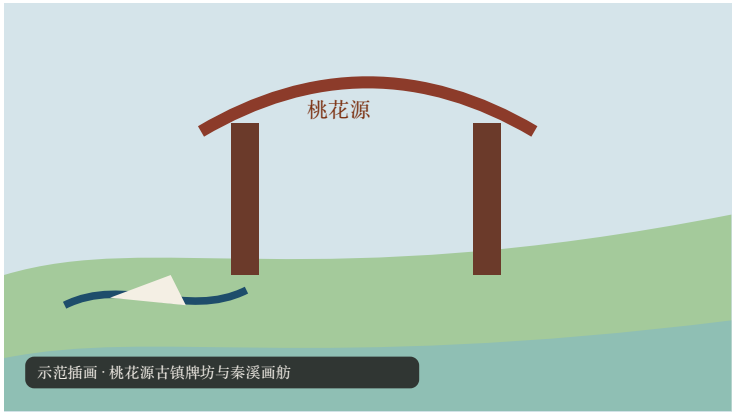

Elevation not in source data

The line below is stop order, not a metric profile.

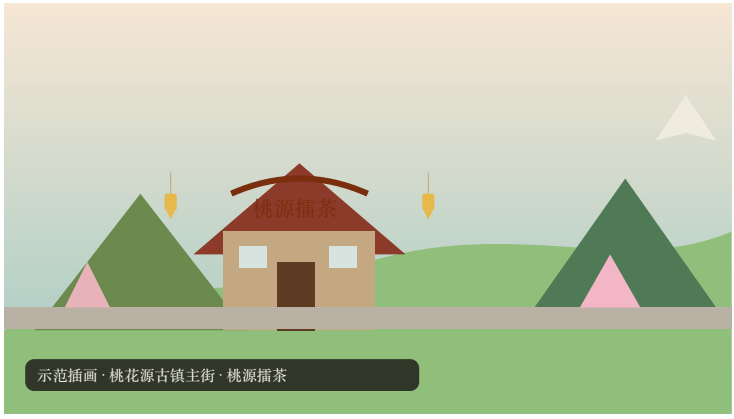

Elevation was not in the source.

Stops with stored coordinates: 桃花源古镇 28.77430° N, 111.42608° E · 五柳湖 · 秦溪 28.75962° N, 111.42886° E · 桃川万寿宫 · 桃川书院 28.79974° N, 111.43166° E

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

A pounded-tea street schematic. The GI brand is 桃源擂茶 (Taoyuan Leicha). The workshop name is 洞仙逸景擂茶 (Dongxian Yijing Leicha). The data has no separate coordinate for this picture.

On this town day the workshop name is Dongxian Yijing Leicha (洞仙逸景擂茶). The geographical-indication brand is Taoyuan Leicha (桃源擂茶). Ask for the brand; look for the workshop. The workshop is not a coordinate in the spot library, so the map keeps its place in the town sequence and does not invent a pin or opening hours.

XXB80-R01 describes a slow morning in the town, Taochuan Wanshou Palace (桃川万寿宫), and the peach forest at Taoxian Ridge (桃仙岭). The page mentions pounded tea and Yuan River fish at midday. Price and seats are whatever the counter says. If the afternoon is gone, stay with the arch, the high street, and the workshop, and leave Qinxi for TY-D01.

TY-R04, which is A04

The live route id is XXB80-R04. The legacy code is A04. That id is what the QR code encodes.

TY-R04 · Two days in the Cha'anpu tea country

TY-R04 is XXB80-R04, legacy A04, titled as the two-day Cha'anpu tea route. The QR code uses that id.

Route topology

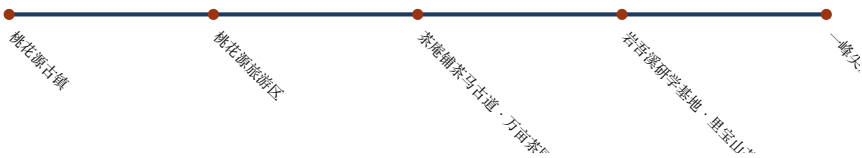

No stored coordinate, order only: 一峰尖原生态茶园体验游

High-contrast print topology.

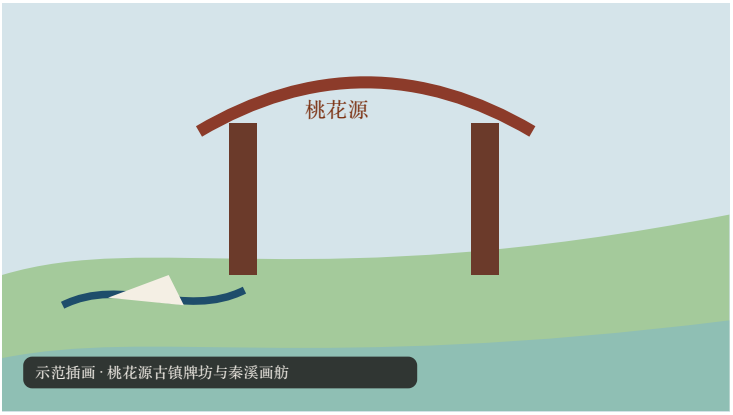

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 桃花源古镇 28.77430° N, 111.42608° E · 桃花源旅游区 28.78106° N, 111.42423° E · 茶庵铺茶马古道 · 万亩茶园 28.64630° N, 111.15612° E · 岩吾溪研学基地 · 里宝山茶园 28.63774° N, 111.28285° E

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

The page calls Cha'anpu (茶庵铺) a thousand-year tea township and the heart of Taoyuan large-leaf tea. Day one is the tea-horse road and the tea hills: picking, mak - ing, and tasting, plus Songyun Square and the tea-garden cycle path, as that page writes them. Day two moves to Li Baoshan at Yangxiqiao and Yifengjian in Guanyinsi. Transport is self-drive or a hired car. Regional note TAOYUAN-R03 describes the same tea country and has no page of its own, so the code opens XXB80-R04.

The same page attaches a Taohuayuan scenic-area link, an 8:30 opening, and a ticket it describes as valid for three days. The price on the window wins; this book does not add another. Cha'anpu's tea hills have a stored point. Yanwuxi and Yifengjian do not.

Three Dayong days: DY-D01, DY-D02, DY-D03

The three days are the city, Tianmen Mountain, and the Wulingyuan stream. Do not fold them into one.

DY-D01 · Dayong day · the old town and the Seventy-Two Towers

Flagship XXB80-R62, legacy C02, is filed as two days. DY-D01 is the city day inside it. The QR opens that two-day page.

Route topology

No stored coordinate, order only: 张家界土家风情园（土司城）

High-contrast print topology.

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 张家界七十二奇楼 29.12019° N, 110.47393° E · 大庸古城 29.12263° N, 110.48210° E · 大庸府城 29.12932° N, 110.47975° E

Day one on the page is the Seventy-Two Towers (七十二奇楼) and Dayong Ancient Town (大庸古城). Day two is Dayong Prefecture Town (大庸府城) and the Tujia cus - toms garden. The transport label is walking, plus a short city hop. Dayong Ancient Town has an OpenStreetMap point in the station file. The towers, the prefecture town, and the Tujia garden do not, so the map keeps order only.

The page presents this as a city route. Night shows and kitchens belong to XXB80-R62 and the street. This book does not quote a room rate.

DY-D02 · Dayong day · Tianmen Mountain

Flagship XXB80-R61, legacy C01. Regional note ZJJ-R03 describes the same mountain day and has no page, so the code opens XXB80-R61.

Route topology

No stored coordinate, order only: 天门山玻璃栈道

High-contrast print topology.

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 天门山国家森林公园 29.03588° N, 110.47374° E · 天门山索道 29.11513° N, 110.47892° E · 通天大道 29.06677° N, 110.47235° E

XXB80-R61 sends you up by the long cableway, along the glass walk, to Tianmen Cave (天门洞), and down the ninety-nine bends of Tongtian Avenue (通天大道). ZJJ-R03 orders the same day as cableway, temple and dove-tree garden, Guigu walk, glass walk, cave, then the park road down. Tianmen Mountain has a WGS-84 pair and a GCJ-02 pair on THY-DY-F05 stop_geo. This book prints the WGS-84 pair and names that file as the source.

The page is not a promise that the cableway or the walks are open. Read XXB80-R61 before you go. The glass walk is described as an experience, not a requirement.

TaoStudio

https://www.taocross.world/studio

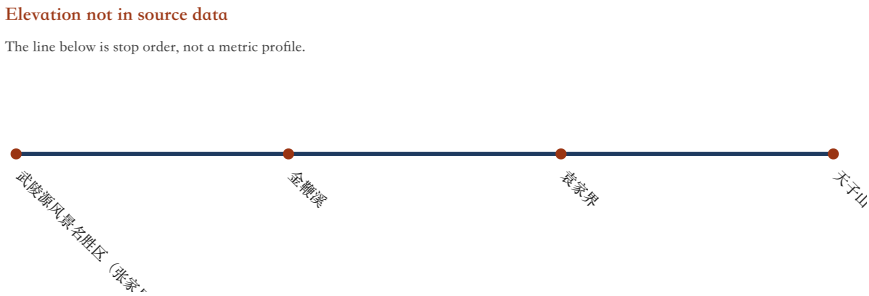

DY-D03 · Dayong day · Jinbian Stream to Yuanjiajie

Day one of flagship XXB80-R63 is Jinbian Stream, with Yuanjiajie if energy allows. DY-D03 is that day. Yuanjiajie, Jinbian Stream, and Tianzi Mountain have no separate coordinates.

No stored coordinate, order only: 天子山

High-contrast print topology.

Elevation was not in the source.

Stops with stored coordinates: 武陵源风景名胜区（张家界国家森林公园） 29.35654° N, 110.46444° E · 金鞭溪 29.33669° N, 110.44615° E · 袁家界 29.24244° N, 110.53868° E

Day one on the page is a bus from Zhangjiajie city into Wulingyuan, Jinbian Stream (金鞭溪) first, and Yuanjiajie (袁家界) in the afternoon if you still have legs. The page uses the popular name Hallelujah Mountain for the pillar. Day two is Yuanjiajie, Tianzi Mountain (天子山), the Bailong elevator, and the western stone forest. Stopping after day one is faithful to this chapter.

Wulingyuan has a stored point and a stop_geo pair that nearly match. The map uses the WGS-84 pair from stop_geo. Jinbian Stream and Yuanjiajie have no point of their own, and the profile does not invent metres. ZJJ-R05 calls the walk from Jinbian Stream to Shuiruo Simen about seven kilometres of gentle path. That distance is in the regional note, not a new survey.

DY-R02: two days in the Wulingyuan core

The day-by-day sentences come from ZJJ-R02. That regional route has no page, so the QR opens the linked flagship XXB80-R63.

DY-R02 · Two days in the Wulingyuan core

DY-R02 follows regional route ZJJ-R02. That id has no page. Its linked flagship is XXB80-R63, and the QR opens that page so it does not 404.

Route topology

No stored coordinate, order only: 十里画廊, 黄石寨, 天子山

High-contrast print topology.

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 金鞭溪 29.33669° N, 110.44615° E · 百龙天梯 29.35206° N, 110.46241° E · 袁家界 29.24244° N, 110.53868° E · 杨家界 28.46534° N, 110.86997° E

ZJJ-R02 is specific. Day one enters at the forest-park gate, then Jinbian Stream, the Ten-li Gallery (十里画廊), and Huangshi Village (黄石寨). Day two climbs by the Bailong elevator to Yuanjiajie, Yangjiajie (杨家界), and Tianzi Mountain, and comes down by cableway or the park bus. That note is two days. XXB80-R63 is three. The extra day is on the flagship page and can be skipped.

The gallery, Huangshi, Yangjiajie, and the elevator have no separate coordinates. The only known point is Wulingyuan Scenic Area. The other stops keep the written order and are marked as uncoordinated. Tickets and the park bus belong to XXB80-R63 and the gate.

Fenghuang: FH-D01, FH-D02, FH-D03

The first stretch stays in town on foot. The next two leave the Tuo River by bus.

FH-D01 · Fenghuang day · the Tuo River

Flagship XXB80-R41, legacy B01. FH-D01 is the walkable river day. Nanhua Mountain on day two stays on the same page.

Route topology

No stored coordinate, order only: 沱江（跳岩 · 泛舟）

High-contrast print topology.

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 凤凰古城 28.02051° N, 109.59919° E · 沈从文故居 27.95066° N, 109.59829° E · 虹桥风雨楼 27.95184° N, 109.60182° E · 南华山神凤文化景区 27.95077° N, 109.60141° E

Day one on the page is the stepping stones, a boat on the Tuo (沱江), Shen Congwen's former home (沈从文故居), the lanes, and Hongqiao at dusk. The page names blood-

cake duck (血粑鸭) and sour-fish soup without a price. Day two repeats the stones at dawn and climbs Nanhua Mountain. Transport is walking.

Fenghuang Ancient Town has an OpenStreetMap point. The river, the stones, the house, and Hongqiao do not. Nanhua Mountain does. Boat fares and any ticket for the house stay on XXB80-R41.

FH-D03 · Fenghuang · Aizhai Bridge and Dehang

Flagship XXB80-R44, legacy B04. Regional day XIANGXI-R02 names Aizhai, Dehang, and Shibadong and has no page. The QR opens XXB80-R44. Dehang has stop_geo; the bridge does not.

High-contrast print topology.

Elevation was not in the source.

Stops with stored coordinates: 凤凰古城 28.02051° N, 109.59919° E · 德夯苗寨 28.34716° N, 109.58398° E · 矮寨大桥 28.33212° N, 109.59832° E · 天问台 28.33658° N, 109.56565° E

Day one of XXB80-R44 leaves Fenghuang for Dehang. The page says about one and a half to two hours by road, then Liusha and Yudai waterfalls and the village. Day two is the Aizhai Bridge viewing platform, the old switchback road if you want it, and Tianwen Terrace in the afternoon. XIANGXI-R02 puts the bridge in the morning, Dehang at midday, and Shibadong village later. Shibadong is not a node of XXB80-R44. If you add it, treat XIANGXI-R02 as a note and still confirm transport on the flagship page.

Dehang uses the WGS-84 pair on THY-DY-F05. The bridge and Tianwen Terrace have no point. A geocode exists for the combined Aizhai – Shibadong – Dehang scenic name. That is not a midpoint on the bridge deck, and this book does not draw it as one.

TC-3D-EW: the Taoyuan 318

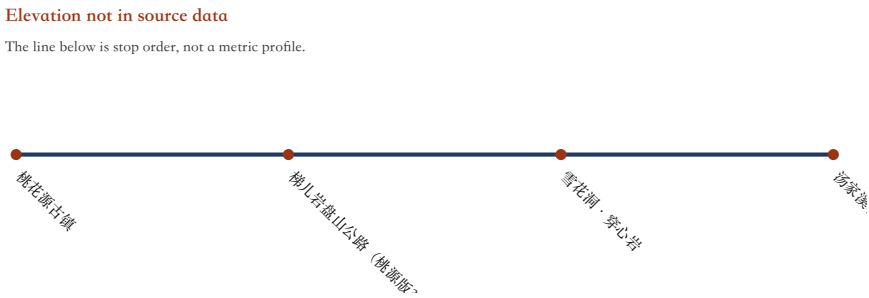

This is a three-day drive west. It is not the three old towns crushed into seventy-two hours. The towns are joined in the seven-day loop of chapter 16.

TC-3D-EW · Three days east – west · the Taoyuan 318

TC-3D-EW is editorial. The east – west three-day file is XXB80-R08. TAOYUAN-R01 is the regional twin and has no page. The QR opens XXB80-R08.

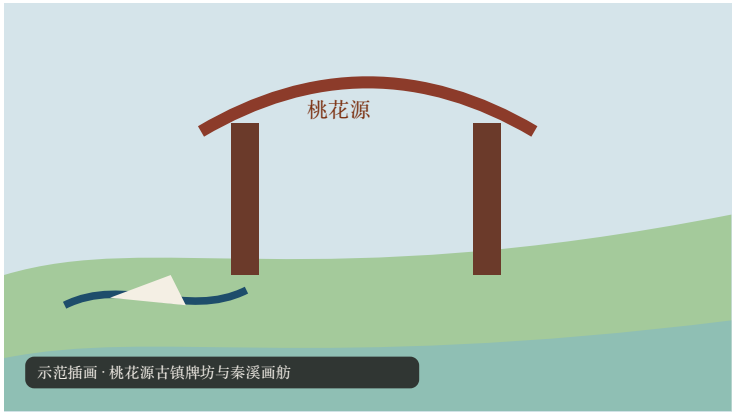

High-contrast print topology.

Elevation was not in the source.

Stops with stored coordinates: 桃花源古镇 28.77430° N, 111.42608° E · 梯儿岩盘山公路（桃源版 318） 29.04836° N, 110.98648° E · 雪花洞 · 穿心岩 29.06543° N, 110.88348° E · 汤家溪村 · 殷家桥风雨桥 29.06405° N, 111.00808° E

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

TAOYUAN-R01 describes a slow provincial-road drive toward Niuchehe, then the S315 Tieryan switchbacks, the "Taoyuan 318" wall, Xuehua Cave, Chuanxin Rock, and Tangjiaxi, with Laozuyan and Sanhong village on the way back. The note says enter by Taoyuan and leave by Niuchehe. XXB80-R08's nodes are the ancient town, the scenic area, Tieryan, the cave, and Tangjiaxi. Laozuyan and Sanhong are not flagship nodes, so this book does not draw them as verified stops.

Tieryan, the cave, and Tangjiaxi all have stored points. The line is self-drive or a hired car. China does not accept an International Driving Permit; that is in the site's pre-trip notes. Read the transport chapter before you drive. Closures belong to the day.

XXB80-R01, and pounded tea on day five

The body of this chapter is two days. Day five is only a note for when the town sits in - side a longer week, so the signboard is the right one.

XXB80-R01 · Two classic days at Peach Blossom Spring

This is flagship one, legacy A01. Chapter 15 follows its two days. If the town is placed inside a longer week, day five asks for the GI brand 桃源擂茶. The workshop remains 洞仙逸景擂茶.

Route topology

High-contrast print topology.

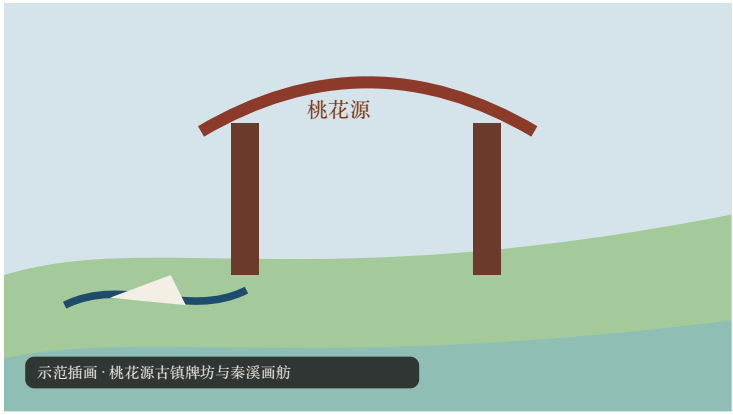

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 桃花源古镇 28.77430° N, 111.42608° E · 桃花源旅游区 28.78106° N, 111.42423° E · 桃川万寿宫 · 桃川书院 28.79974° N, 111.43166° E · 万亩桃林 · 桃仙岭 28.80069° N, 111.43828° E

The arch of Taohuayuan Ancient Town (桃花源古镇). A schematic already in the site files, not a new photograph. Coordinates 28.77430° N, 111.42608° E (geocoded_points stored)

Qinxi and Qingu (秦溪、秦谷), a site schematic. Confirm the landing and the path on the route page. The data has no separate coordinate for this picture.

The overview calls this the shortest way to see what the four characters 世外桃源 are doing on the ground. Day one is the scenic area: Qinxi, Qingu, the stele walk and the old pines on Peach Blossom Mountain, then the town at dusk. Day two is the town, Taochuan Wanshou Palace, and the peach forest, which the page ties to March and April blossom. Transport is the scenic bus plus walking.

A day-five note, not a third day of this route. XXB80-R01 has two days. If your week is still in Taoyuan on day five, order the GI brand Taoyuan Leicha (桃源擂茶). The workshop on the high street keeps the name Dongxian Yijing Leicha (洞仙逸景擂茶). Price, seats, and whether the counter is open are for the shop and the route page.

TC-WL-7D01: a loop from Dayong

The seven day headings follow the THY-DY-F05 page. Day two is Wulingyuan. If that day includes pounded tea, the brand is Taoyuan Leicha (桃源擂茶).

TC-WL-7D01 · Seven days around the Wuling

TC-WL-7D01 is destination route THY-DY-F05. The QR uses its canonical slug. Nodes and day headings come from that page.

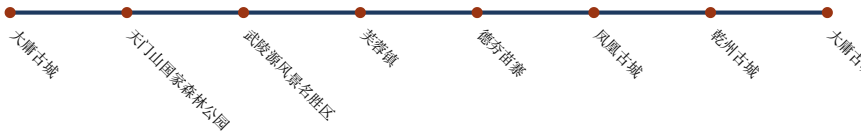

Route topology

High-contrast print topology.

Elevation not in source data

The line below is stop order, not a metric profile.

Elevation was not in the source.

Stops with stored coordinates: 大庸古城 29.12263° N, 110.48210° E · 天门山国家森林公园 29.03588° N, 110.47374° E · 武陵源风景名胜区 29.35654° N, 110.46444° E · 芙蓉镇 28.83178° N, 110.03232° E · 德夯苗寨 28.34716° N, 109.58398° E · 凤凰古城 28.02051° N, 109.59919° E · 乾州古城 28.25759° N, 109.69494° E · 大庸古城 29.12263° N, 110.48210° E

The overview is a seven-day loop from Dayong through Tianmen Mountain, Wulingyuan, Furong Town, Dehang, Fenghuang, and Qianzhou, back to Dayong. Day two on that page is Wulingyuan Scenic Area. It says to see the core landmarks and does not list Yuanjiajie or Jinbian Stream as mandatory. For the stream, open XXB80-R63.

If day two includes pounded tea, ask for the GI brand Taoyuan Leicha (桃源擂茶). Dongxian Yijing Leicha (洞仙逸景擂茶) is the workshop in Taohuayuan Ancient Town. It is not a Wulingyuan shop name. Furong, Dehang, Qianzhou, Tianmen, Wulingyuan, and Dayong have WGS-84 pairs on this route's stop_geo. Fenghuang uses the OpenStreetMap town point. Dishes named on the page, without prices, include Tujia sānxiàguō, Zhangjiajie rice noodles, Liu Xiaoqing rice tofu, Xiangxi bacon, blood-cake duck, and ginger candy.

Leicha: the GI brand and the workshop

A pounded-tea street schematic. The GI brand is 桃源擂茶 (Taoyuan Leicha). The workshop name is 洞仙逸景擂茶 (Dongxian Yijing Leicha). The data has no separate coordinate for this picture.

A Taoyuan Leicha table, drawn as a schematic. The drawing does not set a price.

A Taoyuan Leicha table, drawn as a schematic. The drawing does not set a price. The data has no separate coordinate for this picture.

Mortar and pestle (擂钵、擂杵), a schematic.

Mortar and pestle (擂钵、擂杵), a schematic. The data has no separate coordinate for this picture.

Taoyuan Leicha (桃源擂茶) is the national geographical-indication brand. Dongxian Yijing Leicha (洞仙逸景擂茶) is the workshop name in Taohuayuan Ancient Town. You say the first when you order. You look for the second on the high street. They are not two unrelated businesses, and this book does not invent a third sign.

The public telling traces pounded tea to the Eastern Han, when Ma Yuan's troops were camped in Wuling and ginger, raw rice, and fresh tea were pounded into a “three-fresh” bowl. That is a thread of the story, not this workshop's licence, and not a new historical verdict. The tools you see are a pottery mortar and a wooden pestle. Taoyuan hospi - tality often begins with a bowl before anyone sits down. Whether a given counter still does that is for the day.

The workshop has no stored coordinate, so this chapter does not invent one. The brand page is https://www.taocross.world/brand/桃源擂茶 . The same page also answers https://www.taocross.world/brand/洞仙逸景擂茶 . Both addresses open one explanation.

How it meets the routes

TY-D02 and the town section of XXB80-R01 put the workshop on the high street. The day-five note in chapter 15, day two of chapter 16, the order card in chapter 18, and appendix B all use Taoyuan Leicha when they name the brand. XXB80-R04 at Cha'anpu is tea country, not the pounded-tea workshop. Do not look for the four characters 洞仙逸景 in the tea garden.

TaoCross 书网联动信息框

What to eat, and a bilingual order card

A Taoyuan Leicha table, drawn as a schematic. The drawing does not set a price.

A Taoyuan Leicha table, drawn as a schematic. The drawing does not set a price. The data has no separate coordinate for this picture.

The dish names come from the route pages. They are not a new menu. XXB80-R01 names pounded tea and Yuan River fish. XXB80-R04 names tea-scented chicken, tea-leaf omelette, and local bacon. XXB80-R41 names blood-cake duck and sour-fish soup. THY-DY-F05 names Tujia sānxiàguō, Zhangjiajie rice noodles, straw-hat noodles, Liu Xiaoqing rice tofu, Xiangxi bacon, artemisia cakes, Miao bacon, fermented maize, and ginger candy. None of those pages prints a price. Read the board.

On the order card, pounded tea appears only as the GI brand Taoyuan Leicha (桃源擂茶). If you are already in Taohuayuan Ancient Town, the workshop on the door is Dongxian Yijing Leicha (洞仙逸景擂茶). Say the brand. Look for the workshop.

Bilingual order card

Say this	English	Pinyin and characters
请来一碗桃源擂茶	One bowl of Taoyuan Leicha, please.	Qǐng lái yī wǎn Táoyuán léichá
请现擂	Please pound it to order.	Qǐng xiàn léi
洞仙逸景擂茶	The workshop name, Dongxian Yijing Leicha.	Dòngxiān Yìjǐng léichá
请给我看今日价目	Please show today's prices.	Jīnrì jiàmù
微辣	Mild chilli.	Wēi là
不要香菜	No coriander.	Bùyào xiāngcài
这道是什么肉	What meat is this?	Shénme ròu
我们对花生过敏	We have a peanut allergy.	Huāshēng guòmǐn
一壶茶，先不要酒	Tea, and no alcohol yet.	Yī hú chá
可以打包吗	May we take this away?	Dǎbāo
请确认能不能开发票	Can you issue a receipt?	Fāpiào
结账	The bill, please.	Jiézhàng

Beds: only the overnight places the route pages already name

This book does not name a hotel, a rate, or a number of rooms left. The route pages name kinds of night: XXB80-R01 says sleep in the ancient town; XXB80-R61 and XXB80-R62 say Zhangjiajie city; XXB80-R63 says below the mountain or in Wulingyuan; XXB80-R44 says Dehang or Jishou; XXB80-R41 says a Fenghuang inn by the river, as a kind, not a brand. THY-DY-F05 pins the night to that day's node: around Tianmen, Wulingyuan, Furong, Dehang, Fenghuang, Qianzhou, then Dayong again.

If you check in on a passport or on a Hong Kong, Macao, or Taiwan document, follow the 24-hour registration in chapter 3. A licensed hotel usually files it. A guesthouse or a relative's house may not. Dongxian Yijing Leicha is a workshop, not a hotel. Do not book it as a room.

The lodging section of a route is complete only after you unlock it. The free preview does not show that detail. The rate is whatever that page and the house say on the day.

The taocross.world pass and TaoStudio

The site is https://www.taocross.world . This volume's downloads live at /books . The visa tool is at /?tool=visa . The Taoyuan Leicha page is /brand/桃源擂茶 , and 洞仙逸景擂茶 opens the same page. The studio is /studio .

The passes are still the three in chapter 5. ¥6.9 unlocks one route forever and does not grant 50 credits. ¥52 is seven days and 50 credits. ¥68 each month adds 100 credits that roll forward. Read the checkout before you pay. After the unlock, that route's nine sections, pictures, and exports are the full file.

TaoStudio (桃源工坊) is for a single small site: one owner, several pages, a card you can print. The brand address uses the Chinese shop name. An assistant may score a revision first. A person decides whether it passes. The studio is not a social network and it has no public feed. A price marked as a demonstration on a sample page is not a public rate. The page for Dongxian Yijing Leicha and Taoyuan Leicha does not set a price.

Appendix A — Places, stations, and airports

Each row is English, Pinyin, and characters. Coordinates appear only when the data has them, with the source. Otherwise the row says the data has no coordinate. The IATA codes are the ordinary codes for the three airports the traffic page names: Changsha Huanghua CSX, Zhangjiajie Hehua DYG, Changde Taohuayuan CGD. The page names the airports and does not print the codes, so the codes are labels for lookup. Do not treat this table as a timetable.

Places, stations, and airports

English	Pinyin	汉字	Coordinate
Taohuayuan Ancient Town	táo huā yuán gǔ zhèn	桃花源古镇	28.77430° N, 111.42608° E · geocoded_points stored
Taohuayuan Scenic Area	táo huā yuán lǚ yóu qū	桃花源旅游区	28.78106° N, 111.42423° E · geocoded_points stored

Appendix B — Fifteen core routes and the scan index

Fifteen rows are the core codes used in this book. The editorial name is on the left, the real id in the middle, and the QR code points at an address that does not 404. The pounded-tea brand is Taoyuan Leicha (桃源擂茶). The workshop on TY-D02 is Dongxian Yijing Leicha (洞仙逸景擂茶).

Fifteen core routes. The GI brand is 桃源擂茶. The TY-D02 workshop is 洞仙逸景擂茶.

Book code	Route ID	Days	URL	Note
TY-D01	TY-1DAY-01	1	https://www.taocross.world/routes/taohuayuanguzhen-wuliuhuqinxi-taohuashan-taochuanwanshougongtaochuanshuyuan-shuifuge-bailinzhou	Destination route TY-1DAY-01. The book code TY-D01 is the editorial name. The live page is the slug above.
TY-D02	XXB80-R01	1	https://www.taocross.world/routes/XXB80-R01	TY-D02 is an editorial day. The page that opens is flagship XXB80-R01, a two-day town route. This chapter keeps the town and the workshop; the second day stays on that page.

Book code	Route ID	Days	URL	Note
TY-D03	XXB80-R03	1	https://www.taocross.world/routes/XXB80-R03	Flagship XXB80-R03 is the live page, a two-day rape-flower route. TY-D03 is the river-island day inside it.
TY-R02	XXB80-R02	2	https://www.taocross.world/routes/XXB80-R02	Flagship XXB80-R02, legacy A02. It is the water route beside the Taoyuan day cards, not one of the TY-D day codes.
TY-R04	XXB80-R04	2	https://www.taocross.world/routes/XXB80-R04	TY-R04 is XXB80-R04, legacy A04, titled as the two-day Cha'anpu tea route. The QR code uses that id.
DY-D01	XXB80-R62	1	https://www.taocross.world/routes/XXB80-R62	Flagship XXB80-R62, legacy C02, is filed as two days. DY-D01 is the city day inside it. The QR opens that two-day page.

Book code	Route ID	Days	URL	Note
DY-D02	XXB80-R61	1	https://www.taocross.world/routes/XXB80-R61	Flagship XXB80-R61, legacy C01. Regional note ZJJ-R03 describes the same mountain day and has no page, so the code opens XXB80-R61.
DY-D03	XXB80-R63	1	https://www.taocross.world/routes/XXB80-R63	Day one of flagship XXB80-R63 is Jinbian Stream, with Yuanjiajie if energy allows. DY-D03 is that day. Yuanjiajie, Jinbian Stream, and Tianzi Mountain have no separate coordinates.

Book code	Route ID	Days	URL	Note
DY-R02	XXB80-R63 (source ZJJ-R02)	2	https://www.taocross.world/routes/XXB80-R63	DY-R02 follows regional route ZJJ-R02. That id has no page. Its linked flagship is XXB80-R63, and the QR opens that page so it does not 404.
FH-D01	XXB80-R41	1	https://www.taocross.world/routes/XXB80-R41	Flagship XXB80-R41, legacy B01. FH-D01 is the walkable river day. Nanhua Mountain on day two stays on the same page.
FH-D02	XXB80-R42	2	https://www.taocross.world/routes/XXB80-R42	Flagship XXB80-R42, legacy B02. Regional XIANGXI-R03 names the same wall and village and has no page. The QR uses XXB80-R42.

Book code	Route ID	Days	URL	Note
FH-D03	XXB80-R44	2	https://www.taocross.world/routes/XXB80-R44	Flagship XXB80-R44, legacy B04. Regional day XIANGXI-R02 names Aizhai, Dehang, and Shibadong and has no page. The QR opens XXB80-R44. Dehang has stop_geo; the bridge does not.
TC-3D-EW	XXB80-R08 (source TAOYUAN-R01)	3	https://www.taocross.world/routes/XXB80-R08	TC-3D-EW is editorial. The east – west three-day file is XXB80-R08. TAOYUAN-R01 is the regional twin and has no page. The QR opens XXB80-R08.

Book code	Route ID	Days	URL	Note
XXB80-R01	XXB80-R01	2	https://www.taocross.world/routes/XXB80-R01	This is flagship one, legacy A01. Chapter 15 follows its two days. If the town is placed inside a longer week, day five asks for the GI brand 桃源擂茶. The workshop remains 洞仙逸景擂茶.
TC-WL-7D01	THY-DY-F05	7	https://www.taocross.world/routes/dayongqucheng-tianmenshanguojiasenlingongyuan-wulingyuanfengjingmingshengqu-furongzhen-dehangmiaozhai-fenghuangqucheng-qianzhouqucheng-dayongqucheng	TC-WL-7D01 is destination route THY-DY-F05. The QR uses its canonical slug. Nodes and day headings come from that page.
